BAUER Maschinen GmbH Expands Production Network with New Facility in Pune

Pune, India – BAUER Maschinen GmbH has opened a new production, sales, and service facility in Pune. Approximately 100 employees work on the site, which covers about 15,000 square meters. The facility will be integrated into the company's global production network while also strengthening BAUER Maschinen's presence in the Indian market.

In Pune, BAUER Maschinen combines its international manufacturing processes and development and engineering expertise with local capabilities. The aim is to more closely integrate production, sales, and service while providing customers in India and the region with more direct support.

With the new location, BAUER Maschinen is expanding its local sales and service activities in particular. Closer proximity to customers enables faster coordination and improves support throughout the entire machine lifecycle.

"India is an important growth market for BAUER Maschinen. With our new facility in Pune, we are expanding our long-term presence in the country," says Wulf Flos, Managing Director of BAUER Maschinen GmbH. "Pune will become an integral part of our international production network. At the same time, we are strengthening our local sales and service capabilities to be closer to our customers and provide them with even more direct support throughout the region."

About BAUER Maschinen Group

For almost 60 years, equipment from BAUER has represented the highest performance and quality and constant innovation. The BAUER Maschinen Group is the world market leader in the development and manufacture of specialist foundation engineering equipment. BAUER Maschinen GmbH, which is also the holding company for a number of subsidiaries, designs and builds large-diameter drilling rigs, duty-cycle cranes, trench cutters, grabs and vibrators as well as the related tooling at its plants in Schrobenuhausen, Aresing and Edelshausen. The subsidiaries manufacture state-of-the-art mixing and separation equipment as well as rotary drive systems and equipment for drilling small-diameter boreholes and wells. The BAUER Maschinen Group also operates manufacturing facilities in the USA, China, India, Malaysia, and Turkey. A component supplier within the Group is Schachtbau Nordhausen. The company operates a global sales and service network. More at <https://equipment.bauer.de/en>.

About BAUER

The BAUER Group is a leading provider of deep drilling equipment, equipment and products dealing with ground and groundwater. The Group can rely on a worldwide network on all continents. Its operations are divided into three forward-looking segments: Geotechnical Solutions, Equipment and Resources. BAUER profits enormously from the collaboration of its three business segments, enabling the Group to position itself as an innovative, highly specialized provider of products and services for demanding projects in specialist foundation engineering and related markets. BAUER therefore offers suitable solutions to the world's greatest challenges, such as urbanization, the growing infrastructure needs, the environment, as well as water. The BAUER Group was founded in 1790 and is based in Schrobenuhausen, Bavaria. In 2025, it employed about 10,500 people and achieved total Group revenues of EUR 1.7 billion worldwide.
